DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 is rejected under 35 U.S.C. 102(b) as being anticipated by Canfield (5,790,197).

Regarding claim 1, Canfield shows a decoding step (14), and an interpolating step (20). (See Figures 11-17 for different coefficient factors or weights (K) for different display formats.)

Regarding claim 2, see col. 2, lines 65-67.

Regarding claim 3, see col. 1, lines 13-18.

Regarding claim 4, Canfield shows a receiving step (output from MUX 30), an interpolating step (1-H delay 33 and proportion and combine circuit 34).

Regarding claim 5, Canfield repeats the receiving step and the interpolating step for every row of chroma signals.

Regarding claims 6 and 7, Canfield repeats the above receiving and interpolating steps above for each of the chroma signals (Cr and Cb) in every row.

Regarding claim 8, Canfield shows a video decoder (14), a chroma filter (20), and a line address computer (37). The controller provides different coefficient factors or weights (K) for different formats (see Figures 11-17).

Regarding claim 9, see rejection to claim 2.

Regarding claim 10, see rejection to claim 3.

Regarding claim 11, Canfield shows a chroma line buffer (33, 34, and Figures 3 and 4), which further includes a first multiplier (1-K), a second multiplier (K), and an adder (combiner).

Regarding claim 12, see col. 4, lines 22-32.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 13-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 13, "the interpolated row of chroma Cb pixels" lacks proper antecedent basis.

Allowable Subject Matter

5. Claims 16-18 are allowed.

6. Claims 13-15 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kori et al. (5,914,754) shows a chroma interpolator 22.

Huang (5,650,824) shows a chroma up converter.
